

Contents

- 1- **Self Organization of Inorganic Nanocrystals** L.Motte, A. Courty, Anh-Tu Ngo, I. Lisiecki and M.P.Pileni
- 2- **Structure of Magnetic Nanoparticles and Their self-Assembly** Z.L.Wang, Y. Ling and J.Li
- 3- **Self Organization of Magnetic Nanocrystals at Mesoscopic Scales** J.Richardi and M.P.Pileni
- 4- **In Situ Fabrication of Metal Nanoparticles in Solid Matrices** J.He and T.Kunitake
- 5- **Three Dimensional Self-Assemblies of Nanoparticles** S. Matsushita and S.Y. Onoue
- 6- **Dissipative Structures and Dynamic Processes for Mesoscopic Polymer Patterning** M. Shimomura
- 7- **Self Assemblies of Anisotropic Nanoparticles: Mineral Liquid Crystals** P. Davidson and J.C.P. Gabriel
- 8- **Collectives Properties Due to Self-Organization of Silver Nanocrystals**
A. Brioude, A.Courty and M.P.Pilenii
- 9- **Scanning Tunneling Luminescence from Metal Nanoparticles** F.Charra
- 10- **Collective Magnetic Properties of Organizations of Magnetic Nanocrystal**
C.Petit, L.Motte, Anh-Tu Ngo and M.P.Pileni
- 11- **Exploitation of self-assembled Nanostructures in Optical Biosensors** J.Fendler
- 12- **Nanolithography** D.Ingert and M.P.Pileni
- 13 – **Skrinkage Cracks: A universal Feature** MPPileni
