

## Contents

- 1- **In Search of Microstructure** B. Ninham
- 2- **Structure of Reversed Micelles** D.Langevin
- 3- **Structural Changes of Reverse Micelles and Microemulsions by adding solutes or proteins** MPPileni
- 4- **What can be Expected from NMR in Reversed Micelles?** A.Llor and T.Zemb
- 5- **Fluorescence Quenching in Micellar Systems** M. Van der Auwevraer and F.C. de Schryver
- 6- **Proton Transfer in Reverse Micelles and Characterization of Acidity in the Water Pools** B. Valeur and E. Bardez
- 7- **Femtosecond reactivity of excess electron in Reversed Micelles Water Pool** Y. Gauduel, S.Pommeret and A. Antonetti
- 8- **Photochemistry in Reverse Micelles** M.P.Pileni
- 9- **Magnetic field Dependent reactions in Reverse Micellar Systems** U.E.Steiner
- 10- **Hydrated Electron in Reverse Micelles** C.Petit, L.Motte, Anh-Tu Ngo and M.P.Pileni
- 11- **Synthesis and Surface reactions of Semiconductor crystallite clusters in Reverse Micelle Media** M. Steigeerwald and L.E Brus
- 12- **Microparticle synthesis and Characterization in Reverse Micelles** B.Robinson, A.N. Khan-Lodhi and T.Towey
- 13- **Polymerization in and of Inverse Micelles** G. Voortmans and F.C. de Schryver
- 14- **Some General Considerations about the Field of Proteins-containing Reverse Micelles** P.L.Luisi
- 15- **Interphase Transfer for Selective Solubilization of Ions, Amino-Acids and Proteins in Reverse Micelles** E.B.Leodidis and T.A Hatton
- 16- **Protein Partirioning between Microemulsion Phases and Conjugate Aqueous Phases** P.D.I.Flencher and D. Parrot
- 17- **Applications of Enzyme containing reversed Micelles** R.Hilhorst
- 18- **Reverse Micelles as a Model for the Study of Membrane-Proteins at Myelin Interlamellar Aqueous Spaces** C. Nicot and M.Waks
- 19- **Reverse Microlatexes: Mechanism of Formation and Characterization** F.Candau and M. Carver
